## AKUMA INTRODUCES THE AEGIS VISOR

The new Akuma AEGIS visor is the "first of its kind" fully featured visor on the market. The AEGIS visor features a proprietary hydrophobic and scratch resistant coating on mirrored, and iridium style visors. The proprietary formula beads water off of the visor's surface and makes the visor extremely durable and extremely easy to clean. Bugs, oil, gasoline, and even Plexus™ have no effect and do not stick to the outside of the AEGIS visors. You can literally rub a fingernail over a mirrored or iridium AEGIS visor and you cannot scratch it, something unthinkable with mirrored or iridium visors from other manufacturers. The new Aegis Visors also include "state of the art" anti-fog capabilities.

Kerry Harris, President and CEO, stated "we took a hard and detailed look at some of the problems with today's current visors and endeavored to bring the market a visor with every sought after feature imaginable. It didn't make sense to spend money on an expensive visor that, although it looked good, couldn't stand up to the challenging riding environment. Why not make a visor that looks good, lasts, and can take just about anything the road dishes out."

The AEGIS visor is currently available for all R-Series Akuma Helmets for \$55. Optional colors include gold, mirrored, and iridium.
